

# DataSheet

AlertSite Systems Monitor

The AlertSite Systems Monitor **collects server metrics** using AlertSite's ServerAgent. AlertSite's ServerAgent resides on almost any Windows or Linux server connected to the Internet and **monitors CPU, disk utilization and much more.**

When used in conjunction with the AlertSite Web Site

Performance Monitor and the AlertSite Business Transaction Monitor, ServerAgent provides a more complete view of your online environment. This helps you **quickly identify system**

**failures and optimize performance and service delivery.**

With the AlertSite Systems Monitor, it is easy to add user-defined scripts to the items monitored by ServerAgent. By quickly and easily integrating server resources, users can monitor virtually anything from their environment.

Ensure server is up and running.

Integrate results from any part of the environment.

Track system resource usage.

Capture valuable data for capacity planning.

d e m a n d   p e r f o r m a n c e

## Key Features

- Monitors internal server metrics as often as once a minute.
- Transmits real-time alerts, by phone, e-mail, pager or SMS message, based on user-defined warning and error thresholds.
- Generates daily, weekly and monthly management reports.
- Provides an accurate, comprehensive view of infrastructure performance.

## Easy to Install

AlertSite's ServerAgent is a remotely hosted service requiring only a small software agent installation. Simply download the agent; install it on a currently supported platform; and integrate server monitoring statistics into your AlertSite monitoring console within minutes.

## Unparalleled Service and Support

AlertSite is a leading provider of web performance measurement, systems monitoring and security vulnerability scanning products that ensure your web-based services are always running at peak performance. Founded in 1998, AlertSite maintains 30 global monitoring stations on every continent but Antarctica, serving clients such as AT&T, Circuit City, Honda, Intel, Symantec and organizations representing virtually every industry in the world. If you are not yet a member of the AlertSite customer family, we invite you to call 877.302.5378, or go to [www.AlertSite.com](http://www.AlertSite.com) to sign up for a free trial.

Our highly trained Performance Advisors are always available live from 8:00 a.m. to 6:00 p.m., EST, Monday through Friday. We also offer on-call support through 9:30 p.m., EST.

### Monitoring Console

Site Name	IP Address	Port	Agent	Monitor Status	Monitor	Last Status	Last Checked	Last Response Time	Last Status
www.alertsite.com	192.168.1.10	80	Web Server	0	OK	OK	2008-10-10 10:00:00	0.0000	OK
www.alertsite.com	192.168.1.10	80	Web Server	0	OK	OK	2008-10-10 10:00:00	0.0000	OK
www.alertsite.com	192.168.1.10	80	Web Server	0	OK	OK	2008-10-10 10:00:00	0.0000	OK

The Monitoring Console display provides a continuously updated view of measurements performed for all monitored servers, sites, transactions and devices.

Flexible warning and error thresholds can be set for any of the values monitored by ServerAgent. Receive immediate notification about critical servers, processes and user-defined items.

The Server Monitoring Detail Report (not shown) provides a graphical overview of all monitored values, as well as a history of measurements captured at each interval.

### Threshold Configuration

Item Name	Warning Threshold	Error Threshold	Unit
